Sixnet

DATASHEET

## Sixnet SixView Manager™

### Powerful Remote Management, Monitoring & Control Software

SixView Manager™ is flexible remote management software designed to increase productivity and reduce cost for organizations using Sixnet industrial-grade wireless routers. With a web-based console and customized dashboard, users are able to remotely access, configure and manage critical device information for several, even thousands, of Sixnet IndustrialPro and EnterprisePro Routers from a central location.

Key metrics such as signal strength, data usage, connectivity, IP addresses and alarms are displayed in real time to help simplify troubleshooting. Administrators can remotely set user-based access control parameters, upgrade firmware, configure VPNs and update firewall settings thereby saving time and reducing maintenance costs.

PRODUCT HIGHLIGHTS

- Remote site management lowers total cost of ownership
- Mass configuration simplifies and accelerates deployment
- Configurable parameters enhance security
- Manage thousands of devices from a central web-based console

FEATURES & BENEFITS

Mass Configuration & Auto Provisioning
- **Saves time and deployment costs**
- **Prevents unwanted access with enhanced security**
  - Initial unit configuration
  - Firmware updates
  - VPN configuration
  - Firewall policy enforcement
  - Mass unit migration
    - Grouping control
    - Import devices

Remote Troubleshooting & Control
- **Saves truck rolls**
- **Enables faster troubleshooting**
  - Change and update firmware
  - Change or update policies
  - Remote reboot
  - Delete or modify user access rights

Remote Administration of Multiple Devices
- **Facilitate security compliance**
- **Simplify ease of use**
  - Configuration changes
  - Job scheduling (single or multi device)
  - Intent-to-edit protections
  - Customize data grid views
  - Control user permissions (control editing capabilities)

Remote Monitoring & Reporting of Key Metrics
- **Provide real-time status**
- **Enable proactive decision making**
  - Up-time
  - Utilization
  - Signal strength
  - Firmware version
  - ESN, MDN or IMEI
  - IP address

FLEXIBLE. RELIABLE. POWERFUL.

Sixnet SixView Manager
Powerful Remote Management, Monitoring & Control Software

HARDWARE & SOFTWARE REQUIREMENTS

Software	Hardware
Web browser (examples: Firefox; Web Kit (Chrome, Safari); Internet Explorer)	Pentium 4, 3GHz or higher
Linux server (examples: Red Hat Enterprise 5; Centos Fedora)	4GB RAM or higher
Apache 2.x	120GB hard drive or higher (multi-drive RAID recommended)
MySQL 5.0.45 or higher	
PHP 5.3.3 or higher	

ABOUT SIXNET

Celebrating 35 years in operation, Sixnet provides innovative machine-to-machine (M2M) connectivity to industrial customers and markets worldwide. Sixnet's flexible solutions enable organizations to cost-effectively increase business productivity. By integrating powerful enterprise-class networking with rugged reliability, Sixnet meets the standards of the most demanding industrial applications in industries such as power & energy, banking & retail, transportation, video & security, utilities, military, mobile data, maritime and more. Based in Ballston Lake, NY, the company has offices across North America, Asia and Europe.
